Table 1. Performance (mean $\pm$ standard deviation) of selected loss functions across GWN, LSTM, TCN, and MLP architectures at the $t + 1$ prediction horizon. Loss functions are grouped into non-weighted, existing weighted, and novel weighted categories. Bold onset recall values denote the highest-performing model for each loss function, while underlined values denote the second-best performer. The ** marker indicates the overall best onset recall across all model-loss combinations.
